

AJ-P2C016RG

Panasonic

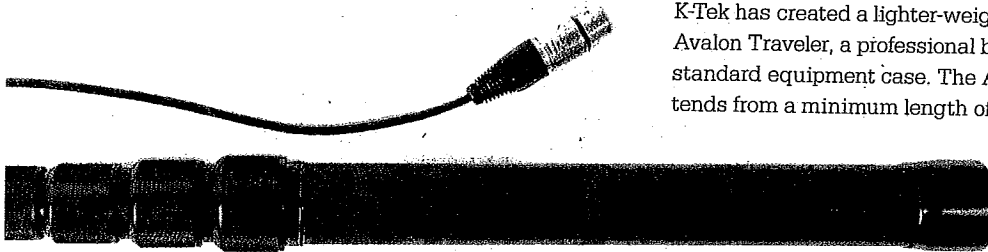

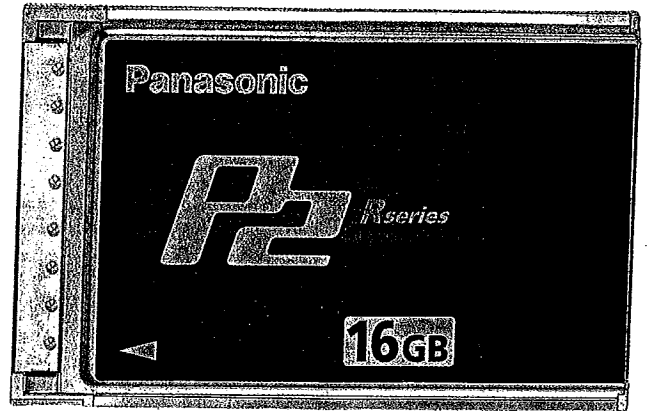

Part of the rationale for adopting solid-state storage systems for acquisition was that their capacities would quickly rise as prices dropped. Case in point: Panasonic's AJ-P2C016RG 16GB P2 card doubles the storage capacity of its predecessor, and it's listed at \$900 (compare to the 8GB card, currently listed at \$700). The AJ-P2C016RG is a PCMCIA-compatible plug-in card based on solid-state memory, integrating four high-performance SD cards such as those now used in digital still cameras. P2 cards record about one minute per 1GB at DVCPRO HD rates—which, with a four-slot camcorder and 16GB cards, will now get you more than an hour of recording before you need to offload.

▶ Almost infinitely reusable. Price: \$900

▶ Extends through six sections. Price: \$325 (unwired); \$395 (wired)

Avalon Graphite Traveler

K-Tek

K-Tek has created a lighter-weight carbon-fiber version of the Avalon Traveler, a professional boom pole designed to fit in a standard equipment case. The Avalon Graphite Traveler extends from a minimum length of 22in. to a maximum reach of

92in. Telescoping sections lock together via K-Tek's proprietary "captive collet" coupling system for maximum holding power with minimum torque, according to the company.

Constructed of the same high-quality graphite tubing as the Klassic boom pole series, the Traveler is designed for ENG, EFP, and DV production. The Avalon Graphite Traveler comes either unwired (#KEG-88) or factory-wired with an internal coiled cord and a sturdy male XLR mounted in the base (#KEG-88CC).

1x1 4-Lite Complete Kit

Litepanels

The four heads of the Litepanels 1x1 4-Lite Complete Kit can be used separately on their stands or mounted via standard TVMP receptacle—or combined in multipanel configurations for any number of lighting situations. Available in daylight flood or sport and tungsten flood versions, the LED lighting kit provides four separate Litepanels 12"x12" fixtures and a detachable mounting yoke. Each fixture comes with its own AC adapter/power supply, power cable, tripod stand, and set of color/diffusion gel filters. Users have the option of adding the LP-2x2 frame assembly for larger lighting configurations, the LP-2x2 power supply/wiring harness, Litepanels' Remote Dimmer Kit, or the DMX Interface Module.

▶ Includes compact carrying case. Price: \$8,995
